

UEE1303(1072): Homework 1

Due Day: 2018/3/21

[INSTRUCTION]

Please submit your code to OnlineJudge system. TA will record your score on the platform.

[PROBLEM 1] PRINT THE MAXIMUM NUMBER

[DESCRIPTION]

Please download pgh_1_1.cpp and complete the program.

The program overloads method `findMax`, which prints the maximum number among three parameters with the same data type (either int or double).

The expected output is as follow.

```
7
3.9
```

[NOTE]

1. Please do not print the maximum number directly.

[PROBLEM 2] PRINT PERSONAL INFORMATION

[DESCRIPTION]

Input a student's name, student ID and grade that are separated by comma. Then display the personal information in the console with a specified format.

Please use integer to input the grade and display its corresponding ordinal number in English (first, second, third and fourth).

[INPUT / OUTPUT FORMAT]

Input:

```
TA,0550720,1
```

Output:

```
Hello, I am TA.
My student ID is 0550720.
This is my first year in NCTU.
```

[NOTE]

1. Be careful of the output format. Don't forget comma and period.
